

Feedback UX — Changelog & Wireframes

Source: feedback/feedback.docx · Date: 2026-07-13 · Also: docs/CHANGELOG-feedback.md · Canvas: feedback-changelog-wireframes

Scope. In-scope feedback shipped as T1–T5. Blue-sky media uploads and server-side history remain out of scope.

Changelog summary

Area	Change	Task
Form catalogs	Sector/tasks/workforce multi-selects; exposure definitions; WEL/effects suggest	T1
Models / PLAN	DeliveryModel.none; optional hazard phrase; de-dupe PLAN confirmations	T2
PDCA prompts	Role/terminology consistency; Surveillance vs Workflow Steps copy	T3
CHECK / REVIEW	Methodology + escalation indicators; PII / small-cell alert	T4
Persistence	sessionStorage live draft; localStorage named drafts Save/Load	T5
Build fix	Select onChange typed as string null for Load draft	—

Added / Changed / Fixed (detail)

Added

Form (T1)

- Static option catalogs (sector, tasks, workforce, hazard phrases, health effects, controls).
- Exposure level/frequency definition helper text; overrideable WEL and health-effect suggestions.

Persistence (T5)

- Live draft (sessionStorage) across pages; named drafts (localStorage) Save / Load / Clear.

CHECK / REVIEW (T4)

- methodology_assessed and escalation_process_assessed; Trend PII / triangulation alert.

Prompts (T3) / Models (T2)

- WORKFLOW_CONSISTENCY_RULES, strengthened guardrails; DeliveryModel.none.

Changed

- Sector & tasks dropdowns/multi-selects; “Number of workers exposed”; “Model of OH Delivery”.
- Hazard phrase optional (phrase or substance/agent required); PLAN confirmations de-duplicated when risk-assessment block shown.

Fixed

- Draft Load Select typing so Next.js npm run build succeeds.

Wireframe 1 — Organisation & drafts

After feedback · Shared OrgHazardForm (Workflows / Compliance / Trend / Improvement)

PLAN — Organisation & Risk Profile

[Draft name](#)[Save draft](#)[Load draft](#)

Organisation Name *

Sector *

Dropdown + Other (was free text)

Key Tasks (select all that apply)

- ☐ Metal grinding
- ☐ Spray painting
- ☐ Welding

Sector-aware checklist + Other

Number of workers exposed

Was: Workforce Size

Model of OH Delivery

Includes: No OH service currently in place

Number of Sites

Workforce Characteristics (select all that apply)

- ☐ Shift / night workers
- ☐ Temporary / agency workers

Multi-select + Other (was free text)

Wireframe 2 — Hazard profile

Hazard Profiles *

Hazard 1

Category

Exposure Level

At or above action values /
WEL...

Frequency

Several times per week

Duration

Hazard Phrase (optional — select all that apply)

- ☐ H334 — May cause allergy or asthma...

No longer mandatory; substance/agent may stand alone

Substance / Agent

Workplace Exposure Limit

Auto-fills from agent when known — override freely

Potential Health Effects

- ☐ Occupational asthma / respiratory sensitisation

Existing Control Measures

- ☐ Local exhaust ventilation (LEV)
- ☐ Respiratory protective equipment (RPE)

Wireframe 3 — Compliance Assessment Indicators

CHECK page — two new indicator booleans from feedback

Assessment Indicators

Yes

Employee Coverage Assessed

Yes

Interval Adherence Assessed

No

Governance Assessed

Yes

Methodology Appropriate

No

Escalation Process Assessed

Wireframe 4 — Trend Analysis PII warning

Surveillance Summary *

Use anonymised data only

Do not include identifiable or personal data. Avoid small groups whose combined details could enable triangulation of an individual.

Provide a summary of your surveillance data for analysis

Over the last 12 months, 15 audiometry tests were conducted...

Cross-page persistence

Live draft → sessionStorage (auto). Named drafts → localStorage (Save/Load). Same shared form hydrates Workflows, Compliance Audit, Trend Analysis, and Improvement Plan.
